High School Completion - Legacy Rates (by age 21)

Beginning in 2009-10, the Wisconsin Department of Public Instruction (DPI) began reporting high school completion rates using the adjusted cohort rate formula. Adjusted cohort rates provide information about the number and percentage of students who earn a high school completion credential within a amount of time (four, five, or six years). DPI reported legacy high school completion rates through 2011-12. Legacy rates provided information about the number and percentage of students who earned a high school completion credential by age 21 in any given year. The School District Performance Report only reports legacy rates. **Please visit the WISEdash Public Portal to view adjusted cohort high school completion rates.** <http://wisedash.dpi.wi.gov/Dashboard/Page/Home/Topic%20Area/Graduation/>

DPI implemented a new staff reporting system for the 2014-2015 school year. As with any new data system implementation, data reported through the system for both the 2014-2015 and the 2015-2016 carry a data cautionary advisory. DPI is working to improve data quality and going forward data users can expect to see continual improvement in data quality. This year's The 2016-2017 collection marks good progress towards improved data quality as enhancements to data validations and data review methods have been implemented into the WISEStaff data collection. For district submitted corrections to this information please see the [Data Errata after DPI Publication Page](#).
